ASSA ABLOY Access Control secures BMCE Bank Headquarters with Aperio™

Example glass door with Aperio™ akin to installation at BMCE Bank

Company

BMCE Bank
Headquarters

- About 5,000 staff members in Morocco
- Nearly 2 million bank accounts
- A specialized network of more than 560 branches, including 20 business centres and one Corporate branch
- More than 600 ATMs

Segment: Financial
Property type: Headquarters

Plant location city: Casablanca
Access control system: Aperio™
Aperio™ Partner: CST Sécurité
Number of Aperio™ Cylinder: 50 electronic double knob cylinders with Euro profile

Challenge

BMCE Bank is one of the largest commercial banks in Morocco, with a network of 560 branches.

As part of a complete overhaul of its headquarter's security arrangements, the bank needed a wireless locking technology to provide 50 of its glass doors with an instant upgrade to an access control system, without compromising on aesthetics.

Solution

Easy to install, ASSA ABLOY Access Control's Aperio™ cylinder enabled a simple security upgrade from the mechanical systems in place to a sleek access control wireless locking solution.

With Aperio's flexible design and ability to work with iClass®, Mifare™ Plus and Mifare™ DESFire™ technology credentials, there was no issue with Aperio™ instantly connecting to the existing online access control system at BMCE Bank, with minimal modification to doors and premises.
